<b>Office Action Summary</b>	<b>Application No.</b> 10/604,698	<b>Applicant(s)</b> HOU, TANG FOO	
	<b>Examiner</b> Matthew Johnson	<b>Art Unit</b> 3682	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Claim 2 is allowable. The restriction requirement between Species I Figures 1-3 and Species II Figures 6-7, as set forth in the Office action mailed on 4/25/2006, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 7-10, directed to Species II are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### *Allowable Subject Matter*

2. Claims 2-10 are allowed.

3. The indicated allowability of claims 11-14 is withdrawn in view of the newly discovered reference(s) to Hanatani (USP-6,718,844). Rejections based on the newly cited reference(s) follow.

***Specification***

2. The disclosure is objected to because of the following informalities: in the second to last line of paragraph [0024], "bias spring 34" should be --bias spring 36-- and "intermediate member 36" should be --intermediate member 34--.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 11-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Hanatani (USP-6,718,844).

Re clms 11-14: Hanatani discloses a bicycle twist-grip shift control device comprising:

- A base member (14) for attachment to the bicycle
- A twist-grip operating member (16) rotatably supported relative to the base member for rotating in first and second directions around an operating member axis

- A transmission control member (18) rotatably mounted relative to the base member to directly pull and release a transmission control element (11), wherein the transmission control member rotates around a transmission control member axis that is substantially parallel (as defined by Applicant's Remarks 8/10/2006) to the operating member axis
- An intermediate member (17) that moves in a direction of an intermediate member axis in response to rotation of the operating member (C4 L57-64), wherein the intermediate member includes an intermediate member detent (17a, 17b, 170, 171) for maintaining a rotational position of the operating member and the transmission control member
- Wherein the intermediate member moves separately from the transmission control member (17 moves axially while 18 rotates)
- Wherein the intermediate member moves axially relative to both the transmission control member (18) and the operating member (16) (C4 L57-64 & C5 L16-27 & C5 L52-58)
